EDUCATION

Crescent University

B.S. in Computer Science

Ogun, Nigeria

Expected Graduation, May 2027

EXPERIENCE

Nigeria Association of Computing Students (NACOS National)

DevOps Engineer

Ogun, Nigeria

Nov 2025 – Mar 2026

- Containerised 3+ applications using Docker, eliminating environment inconsistencies across development and production
- Engineered CI/CD pipelines using GitHub Actions, automating deployments and slashing manual release time by 40%
- Automated AWS S3 operations through Bash scripting, streamlining storage management efficiency by 35%
- Provisioned and maintained cloud infrastructure using Terraform, codifying 5+ AWS resources as Infrastructure as Code

Lagos State University Of Science And Technology

Technical Lead

Lagos, Nigeria

Jul 2025 – Oct 2025

- Spearheaded a team of 5 students to architect and deliver a responsive React and TypeScript web application 2 weeks ahead of schedule
- Deployed and configured Linux environments across 11 laptops, standardising software installations for 53 student projects
- Streamlined student data management and exam preparations, cutting manual errors by 31% and boosting workflow efficiency

Lyfebites LEMP

Software QA Tester

London, England

Jul 2022 – Jul 2023

- Executed 23 manual and exploratory test cases across multiple projects, enforcing software quality and specification compliance
- Detected, documented and escalated 53 bugs through rigorous positive and negative testing, accelerating issue resolution by 31%
- Engineered detailed test reports and dashboards, sharpening team tracking accuracy by 27%

PROJECTS

Voting App

Solo Project

Ogun, Nigeria

Jan 2026 – Mar 2026

- Architected a full stack voting application with Python Flask backend and HTML/JS frontend, containerised with Docker and shipped to DockerHub enabling one-command deployment anywhere
- Provisioned AWS S3 infrastructure using Terraform replacing manual console clicks with repeatable code, and engineered a GitHub Actions CI/CD pipeline automatically building and pushing Docker images on every commit
- Secured infrastructure secrets using GitHub Actions encrypted secrets, eliminating hardcoded credentials and following least privilege security principles

Serverless Blog Website

Team Lead

Ogun, Nigeria

Oct 2025 – Dec 2025

- Engineered a fully serverless blog platform leveraging AWS Lambda, API Gateway, DynamoDB and S3, delivering full CRUD functionality supporting 51+ posts with zero server management overhead
- Architected image upload pipeline to S3 and post storage in DynamoDB sustaining zero downtime for 3+ months

SKILLS

DevOps & CI/CD: Docker, Terraform, GitHub Actions, Git, Linux, Bash, Python

Cloud & Infrastructure: AWS (EC2, S3, VPC, IAM, Lambda, API Gateway, CloudWatch, SES, SNS, RDS, DynamoDB, Bedrock, Load Balancers, Auto Scaling, NAT Gateway, Security Groups)

Security & Monitoring: IAM Policies, Least Privilege Access, Encryption, Secrets Management, CloudWatch Metrics and Logs
